HOSPITALITY.

Visual Communication Solutions  
for the Hospitality Sector.

GLOBAL VISION • LOCAL REACH • ONE COMPANY

The very word hospitality implies a caring relationship, a personal service that will prosper when guest satisfaction is achieved. A well-designed sign system that ensures that customers find where they need to go and feel safe is essential, adding value to the service and support the brand vision.

Modulex can design, consult and produce interior/exterior branded and wayfinding signage for the hospitality industry. We have been doing it for decades. Whether you are a global hotel brand, single location or event venue, we can help.

Our visual communication solutions range from our signature modular signage families to custom options for a more bespoke brand expression. Our products include the very best in tactile and braille solutions to ensure guest satisfaction and compliance.

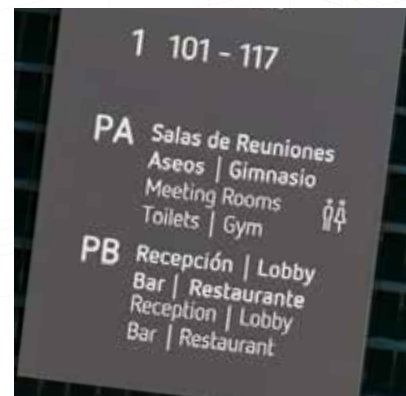

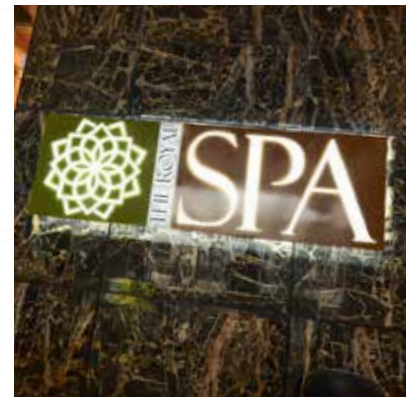

Wayfinding is the name given to the "art and science" that allow us to put the correct information in the right place at the right time to provide the user with an effortless journey through a possibly tricky environment.

Our several decades of wayfinding expertise will help you navigate your project. We will help you ensure your guests and employees experience will be stress-free.

The Modulex advantage is our ability to offer  
end-to-end project management.  
You dream it, we design, build and install it!
