

Wave.

Beautifully shaped with dynamic curves, responsibly made from 100% recycled acrylic with a 75% lower footprint.

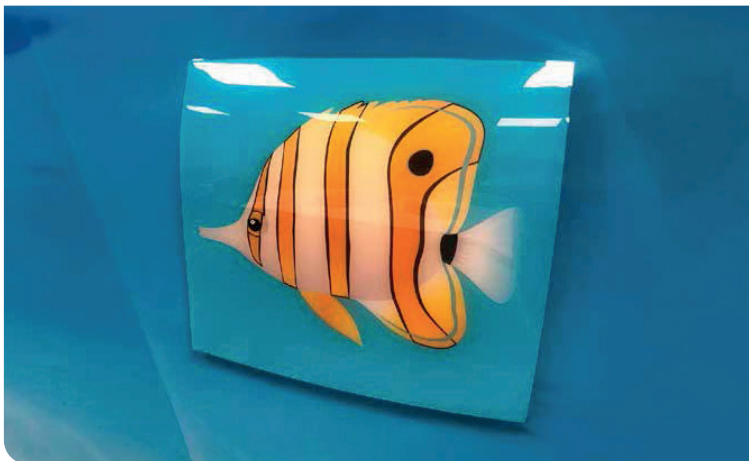

Meet Wave.

A new dimension in sustainable signage, Wave is more than just a sign. It is a statement.

With a sculptural, three-dimensional form, Wave turns every sign into a functional design element that elevates interior spaces. Crafted from transparent GreenCast® acrylic, which is a 100% recycled material made from reclaimed acrylic sheets, Wave reduces demand for raw materials and delivers a 75% lower carbon footprint than virgin acrylic.

Bright, vibrant colours are printed on the back of each sign, and the hues are visible from the edges, adding a refined visual detail that ensures each sign feels tailored to the architecture it inhabits.

If you are looking for signage that is as forward-thinking as your space, Wave brings innovation, elegance, and environmental impact together in one signage solution.

Why Wave?

Wave adapts to any environment with a range of formats and thoughtful features. Each sign is engineered for clarity, durability, and visual impact.

> Key Features:

Materials: 3 mm transparent GreenCast® acrylic (100% recycled, reclaimed acrylic sheets).

Graphics: UV back-printed for vibrant, long-lasting colour.

Accessibility: Tactile text and Braille available for inclusive wayfinding.

Customisation: Fully customisable layouts for graphics.

Design: Three-dimensional, double-curved profile adds depth and visual interest.

Sustainability & Assurance.

Wave is designed with the planet in mind, from material sourcing to end-of-life recycling.

Choosing Wave means making a positive environmental impact without compromising on style or performance.

> Sustainability Highlights:

Recycled Content:

100% GreenCast® acrylic, made from reclaimed acrylic sheets.

Carbon Footprint:

75% lower than traditional, virgin (non-recycled, newly produced) acrylic.

Chemical Safety:

VOC-free (volatile organic compound) and HFC-free (hydrofluorocarbon) material.

Take-Back Program:

Signs can be returned to Modulex for closed-loop recycling or recycled locally.

> Assurance.

Every Wave sign is backed by a 2-year guarantee, covering product and functional defects when installed according to Modulex A/S instructions. You can trust Wave to deliver a beautiful product with lasting performance and peace of mind.
